

componize DITA CMS

Unlock the True Potential of DITA at the Enterprise Scale

A DITA CMS In a Class of its Own

Componize is a DITA content management system that optimizes the authoring, management and publishing of high-volume product information. Used by thousands of technical writers and content contributors across the world, Componize has a proven track record in the automobile, software, high-tech, medical, education and publishing industries. Today, Componize is optimizing content strategy on an enterprise scale for SAP, Intel, Kaplan and Merck, among others.

4 reasons to choose componize

LARGE-SCALE COLLABORATION MADE EASY

Content heavy organizations need to maximize the possibilities for content reuse, multi-channel publishing, team productivity and improving content quality. This not only requires DITA XML management and publishing capabilities, but also enterprise-class collaboration.

Our seamless integration with Alfresco, the leading open platform for Enterprise Content Management and Business Process Management, allows you to take advantage of the best of Componize's Component Content Management features alongside Alfresco's world leading content management platform.

WE GET EXPERTS ON BOARD, EASILY

Getting your collaborators on board, and fast, is essential. Our simple web interface lets external contributors get to work right away – no installation or lengthy training required. We also provide easy-to-use editing tools that are either web or Word based. Componize can manage both structured and unstructured content, so experts inside or outside your organization can continue to use the tools and file formats they're most familiar with.

WE'RE NOT A NICHE SOLUTION OR ANOTHER CONTENT SILO

Because of our integration with Alfresco, you can solve several content challenges with a single platform: XML content management, Digital Assets Management, Office files, etc. Componize can also handle all kinds of multimedia files – image, video, PDF, CAD files or otherwise. Componize can pull content from across your organization and inject it directly into your publications, so you won't need another content silo. Your content and metadata is accessible and usable no matter where it's stored. And, Componize can do more than DITA – we can integrate any XML schema or DTD.

PURE DITA AND OPEN ARCHITECTURE

We believe that your content is yours alone, and that's why strict adherence to standards is our philosophy. Unlike other DITA CMS solutions on the market, we don't add any proprietary information to your content, meaning no vendor lock-in. And with documented open APIs, Componize is one of the most extensible DITA CMSs on the market.

Our customers are saying...

Quick deployment

- “ The Componize on Demand solution was a perfect fit for our organization, the flexibility of this solution met our complex and various specialization requirements. Componize's exceptional customer service and dedication help us meet our challenging deployment timelines. ”
– Kimberlee Adam, PMP, DITA Systems Manager, **Kaplan Professional Education**
- “ Componize was the perfect tool for our project. Easy to learn and integrate, we also benefited from Componize excellent support. ”
– Eric Fox, Business Development Manager at **Dakota Systems**

Outstanding support

- “ I've been very happy with Componize's support. They don't seem to have any junior support techs, everybody I worked with was an expert. They are fast and responsive and work to resolve my issues quickly. ”
– Kresten Mcgrath, Documentation & Training Infrastructure Architect at **Intel Custom Foundry**.
- “ Outstanding support by @componize, with critical bug fixing and release on (Dec) 31st. Thanks, and happy new year! ”
– Colin Maudry, DITA implementer at **NXP Semiconductor**
