

Componize Review

Speed up your content review process

Componize Review offers a user-friendly interface and streamlined workflow to allow for quick reviewer onboarding with no training required.

Whether it's PDF, MS Word or XML documents, you will experience improved timelines from day one, while upgrading the compliance and progress tracking of your entire team.

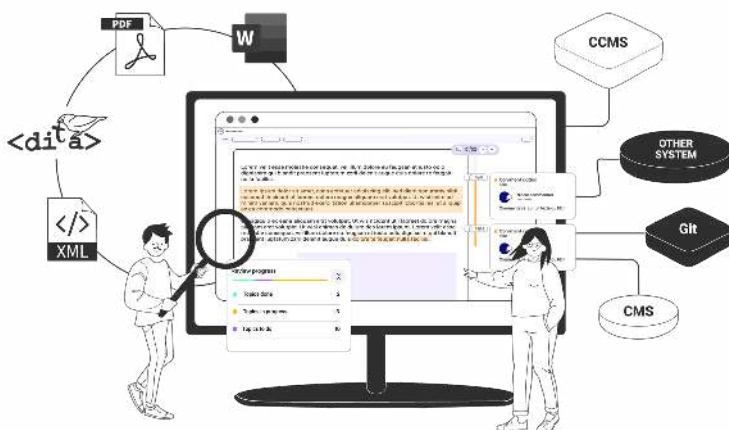

What makes Componize Review a game-changing platform?

It streamlines content review and validation across various formats (PDF, MS Word, DITA, XML). Integrating with multiple repositories, it fetches new content awaiting approval and submits it to reviewers so that the review is **simple, fast, efficient** and **reliable**.

It enhances writer-reviewer collaboration, automating processes and offering real-time interaction, while ensuring full traceability for managers.

In short, it is a collaboration platform with open architecture, aligning writers, reviewers and managers on the same page, reducing time-to-market!

What are the benefits of the Componize Review platform?

A repository and format-agnostic enterprise platform

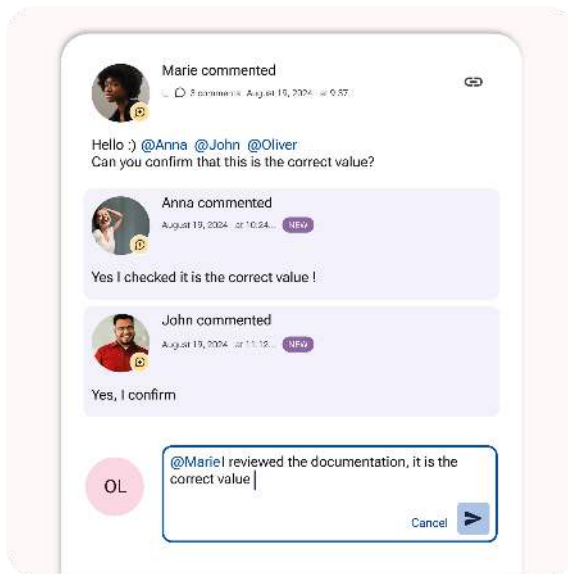

Not all review processes are alike, and some require a high degree of flexibility and scalability.

- Support for PDF, MS Word, DITA XML and any other XML
- Plug in any data source: CCMS, CMS, GIT, third-party systems, etc.
- Design your workflow with a powerful, flexible engine

Facilitate the reviewers job and get content published faster

For experts, content review is typically regarded as a secondary task. By streamlining the process, you save them precious time while also motivating them to complete the job.

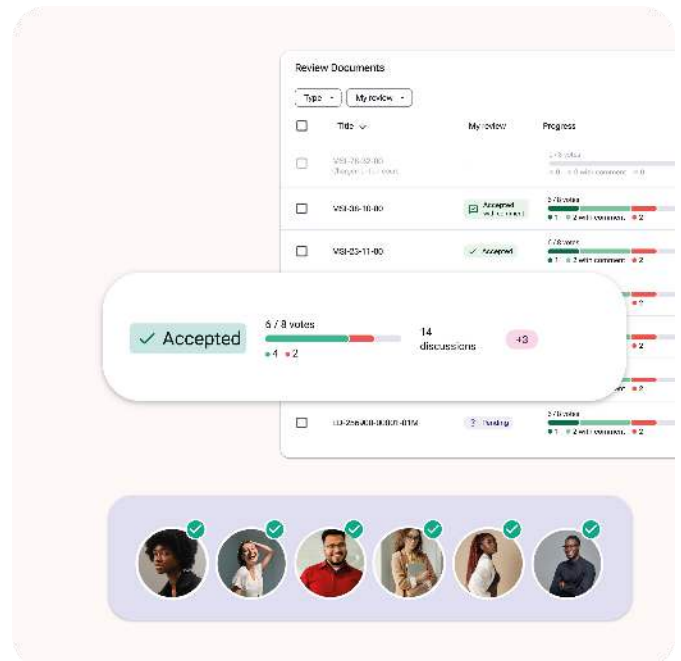

- No training required ; it's as simple as reviewing a PDF.
- Highlight changes and revisions for easy navigation
- Add comments, insights or clarification with a single click.

Stop wasting your writers' time on tasks that don't matter.

Eliminate repetitive and lengthy tasks, and let the writers focus on producing high quality content:

- Conduct reviews in the original document, no need for PDF conversion or manual tracking.
- Access comments and tasks easily for smoother collaboration.
- Review new or modified content and quickly incorporate it into your workflow.
- Integrate Componize Review into your repository without a full system overhaul.

Get a comprehensive view of the process for enhanced compliance, visibility and oversight.

Complete transparency and improved management visibility!

- Track review progress in real time with user access, dashboards, and notifications.
- Log all annotations, comments, and edits with timestamps, and query via API.
- Securely maintain document versions to meet strict regulatory needs.
